International Software Architecture  
Qualification Board

The international Software Architecture Qualification Board ([iSAQB](#)) defines curricula on several levels for software architects.

The terminology used in the iSAQB curricula can be found as a (freely available) ebook, published on [Leanpub](#).

The regulations and criteria of the Expert Level are currently maintained and published in both English (EN) and German (DE). Maintainers and volunteer reviewers collaborate on [GitHub](#) to improve those documents.
